

# 5 WAYS TO UNLOCK YOUR CAR

..if your keys are locked inside

## USE A TENNIS BALL

Though unusual, it does work! Make a hole in the tennis ball, place it over the keyhole, and push. The air force from the ball should unlock the car.

## YOUR HANDY SHOELACE

This only works in a car a pulling-up locking mechanism, but it's not impossible. Tie a small loop, gently push the shoelace into the door or open window. Get the loop around the lock, and pull it up.

## THE OL' COATHANGER TRICK

This method will only work with horizontal locks. Untwist a wire coat hanger, make a hook, and work it into the door. Get the hook around the lock, and pull.

## CALL YOUR LOCKSMITH

It's okay to ask for help. Calling your local locksmith will ensure that you unlock your car quickly, safely, and affordably, getting you on your way in no time.

## BONUS TIP

IF YOU FIND A COIN WEDGED INTO YOUR CAR DOOR HANDLE YOU SHOULD CALL THE POLICE BECAUSE SOMEONE PLACED IT THERE WITH INTENT TO BREAK IN. YOU PRESS THE KEY BUTTON, THINKING THE CAR IS SECURE, BUT A COIN PLACED THIS WAY WILL NOT LET THE LOCK WORK PROPERLY, ALLOWING THE THIEF TO ENTER YOUR CAR. THIS PREVENTS THESE WORDS, "I'VE LOCKED MY KEYS IN THE CAR!"
